FEATURES

ACCESS CONTROL SOLUTIONS

9210 VEHICULAR SLIDE GATE OPERATORS

The model 9210 operator is designed for high security applications only – such as industrial locations, loading docks, factories, prisons, airport security areas, etc. Because of the need to prioritize security in these applications, the 9210 is designed as a fail-secure operator and requires manual operation to open the gate in the event of a power outage. To enhance security, the 9210 features an anti-tailgating circuit and an adjustable partial open feature to help prevent unauthorized vehicle access. In addition, the optional speed controller allows the user to adjust the gate speed from 1/2-ft/sec up to 2-ft/sec.
